

# **1D Barcode Scanner User Manual**

**Barcode Scanner Quick  
Set-up  
V2.0**

## Notices:

- All softwares(including firmwares) within the scanner packages are protected by the copyright of our company.
- Manufacturer claims to have the right to upgrade the software(including the firmwares) in the target of promoting the stablization or other functions of scanner.
- If the contents of brochure corrected, we will not inform you in advance.
- The standard package contains: One Laser Scanner, One USB Wire, and a User Manual
- Optional Accessory: 1 Stand

## Brief Introduction:

Our series scanner has powerful light source and enhanced long distance scanning technology so that it is able for us to quickly recognize damaged dusted and bad printing barcode. Industrial time-enduring quality guarantees its privilege of stable function and long bearing. High volume buzzer provides another way to confirm in chaotic industrial environment.

## Strengths:

- Enhanced water proof and dust proof capability to IP-54 Industrial Level, especially for use in moist and hazy environment.
- Manual Trigger/ Continuous Scan/ Auto Sense(Optional), ultra comfortable operating
- Strong barcode identify strength, which could scan colored barcode, plastic covered barcode, non-white background barcode.
- Recognize, set and update software from remote distance.
- Up to 10,000 hours laser life, French press key with life of 3 million pressing times.
- 1.8m Free Fall down to concrete ground. Satisfy 24 hours long time using.
- Support RS232,usb,and KBW Interfaces.
- Flexible, harmony shape reduces overfatigues, level up working efficiency.

## Applications:

- Suitable for commercial use(3C, Publishing, Fabrics, Medicine, Cosmetics,etc),Retailing, Post, Telecom, Warehouse, Express, Police, Customs, Banks, Hospitals.
- Compatible with Windows98 and above, Android, Linux, operating systems. Plug-in use, no need for installation. Compatible with all kinds of POS, Tablet, Cash Drawer, Tax Control Machines. Also work with various retailing, ERP, warehouse management,Invocing softwares.
- Multinational Keyboard Language

## Laser Scanner Standard:

### Technical Parameters

Scan Mode: Single line Bi-directional

Light Source: 650(visible laser)

CPU: 32 digits ARM

Scan Speed: 200 line/sec

Depth of Scan: 2.5mm-600mm

Width of Scan: 18cm

Print Contrast: 20% minimum

Corner: +/- 30o

Elevation:+/- 45o

Deflection:+/- 60o

**Decode Capacity:** UPC/EAN,UPC/EAN(include complement code), Code 128,UCC/EAN128,Code39, Code39 Full ASCII, Code128 Full ASCII, Codabar,Interleaved 2of5,Code93,MSI, Code11, ISBN, ISSN, China Postage,etc.

**Bit Error Rate:** 1/5 millon

**Resolution:**3 mil

**Prompt:**buzzer, Led Light

**Scan Model:** Handheld/ auto-sense

**Press key Life:**3millon

**Laser Life:** 10,000 hours

**Interfaces:** RS232,PS2,USB

**Wire Length:**2m(30m optional)

## Working Conditions

- Working Temperature: 32°F to 104°F/0°C to 40°C
- Storage Temperature: -40°F to 140°F/-40°C to 60°C
- Humidity: 5% to 95% relative humidity (no condensation)
- Ruggedness: Resist about 6 times drops from 1.5m to concrete ground
- Ambient Light Immunity: Under normal office and factory ambient lighting conditions, or exposed to the sun won't take any effect to it.
- Electrostatic discharge: In line with 15KV air discharge and 8KV contact discharge requirements

## Related Regulations

- Electrical safety: In accordance with UL1950、CSA C22.2 No.950、EN60950/IEC950 EMI/RFI:FCC Part 15 Class B、European Union EMC Directive、Taiwan EMC、
- Environment Terms: In accordance with RoHS directive 2002/95/EEC

# Outlook

## Wire Installation

### USB Wire Installation

One USB Wire optional, as the above picture shows. Notice:  
The host could provide power for the scanner through USB wire.  
Scanner does not need additional power supply.

## Installation process is as follows:

1. Plug the RJ45 end to the tail of the scanner.
2. Connect the other end to the PC USB interface.
3. The buzzer and LED light will give a signal if connected right.
4. Windows will detect the USB device automatically.

## Installation of RS232 Wire

The scanner can choose one RS-232 optional, its connection is as shown in the picture. The installation method is as follows:

1. Shut down the power
2. Connect the crystal end to the tail of the scanner.
3. Connect the other end to the host's 9-pin interface.
4. If the host (Ninth pin of the serial interface) doesn't supply electricity, you will need an additional 5V power supply.
5. Turn on the power supply, the buzzer and LED light will give out signal if connected right.

# Demolition of the wire

The demolition method is as follows:

1. Find the hole close to the end of the scanner
2. Put a thin needle into the hole, softly drag the wire out

## Scanning

Handheld Scanning

1. Guarantee the connection is all right.
2. Press the key, the red laser came out. Let the line covers the barcode, when the beep sound rises, the green led vanishes, than the barcode is read and the data transmitted to the host.

Manual Mode

Autosense

## Auto mode:

1. In some applications, we will need auto function. The auto mode has 'continuous function' and 'autosense function'.
2. The stand should be adjusted right to get a good reading distance

# General Configuration

Note: After scanning the Defaults Barcode, you will reset configuration to defaults
